

**PRIMARY
INDUSTRIES**

PRIMARY Industries

Get out of the classroom and into the outdoors as part of this all-action entry into working in the Primary Industries sector.

Get a taste of our region's main primary industries of agriculture, forestry, horticulture and viticulture. Learn how to ride quad bikes and use chain-saws safely. Go on heaps of field trips to orchards, farms, commercial forests and vineyards to find out what makes this industry tick.

This is a great place to start if you're after a hands-on job in the outdoors.

Starts: February 2017
Time: 9am to 2.45pm one day a week
Location: NMIT Marlborough and Richmond

TRADES ACADEMY TRAINING

- Industry Employment Apprenticeships and ITO Training
- Tertiary studies at NMIT in Horticulture, Viticulture and Wine, Conservation
- Telford (a division of Lincoln University), South Otago
- University Studies at Lincoln or Massey

Dairy Farm Worker

 Viticulture Worker/Manager

Shepherd
 Share Milker
 Winemaker
 Sheep Farmer
 Spray Contractor
 Saw Doctor

Fencer
 Horticulturist
 Chainsaw Operator
 Farm Manager
 Livestock Agent
 Herd Manager

SAM GLASSON

PRIMARY INDUSTRIES *Nelson College*

Sam enrolled in the Trades Primary Industries programme because he's looking at a career in farming and he thought that the practical skills would be really beneficial. After he finishes school he plans to work on a farm for a while and then go to Telford to study agriculture.

For Sam, learning to use ATV (quad) bikes and chainsaws has been a real highlight. "Trades is a good opportunity to get out and do something practical. I go hunting quite a lot and really like being in the outdoors. The practical skills we're learning will be really helpful for what I want to do in the future."

KIMBERLY FEARN

PRIMARY INDUSTRIES (MARL) *Marlborough Girls College*

Kimberley enjoys the small class size at Trades and the fact that you have to take responsibility for your own learning. She says that the Tutor is always willing to help and the small class size means you get to know other students really well.

"The course is very practical and you learn this first. It makes doing the theory work later much easier. My highlight has been riding the ATVs and learning how to do this safely."

Kimberley's goal is to work on a dairy farm when she leaves school, raising calves.
